

Sameer Ahmed

Artificial Intelligence Student & AI Developer

Karachi, Pakistan · sameerahmedrahi@gmail.com · +92 337 316 8765 · linkedin.com/in/sameer-ahmed-ai · github.com/SameerAhmedAI

PROFESSIONAL SUMMARY

Motivated Artificial Intelligence student at SZABIST (Class of 2027) with hands-on experience building real-world intelligent systems at the intersection of Computer Vision, NLP, and embedded AI. Proven ability to lead project teams, translate academic concepts into deployable solutions, and work across the full stack — from hardware-integrated modules (ESP32) to Python-based ML pipelines. Actively seeking challenging roles and collaborations where technical depth and problem-solving create measurable impact.

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI)

Sep 2023 – Jun 2027

Shaheed Zulfikar Ali Bhutto Institute of Science and Technology (SZABIST) · Karachi, Pakistan

- Semester 5 GPA: **3.11 / 4.0** · Cumulative CGPA: **2.70 / 4.0**
- Specialization track: Machine Learning, Computer Vision & Natural Language Processing
- Team Lead — ZABEFEST (Annual AI Project Exhibition): led cross-functional student group from ideation through live demo in the CV+NLP domain
- Research interest: Uncertainty-aware deep learning for medical image diagnostics

PROJECTS

FixTrack — Maintenance Issue Tracking System

github.com/SameerAhmedAI/FixTrack

Personal Project

- Designed and built a full maintenance-tracking application to streamline reporting, assignment, and resolution of technical issues in an organizational environment.
- Implemented a structured database backend with Python, enabling efficient ticket management and status tracking across multiple users.
- Focused on clean architecture and practical usability — built to solve a real operational problem, not just as a demo.

AI-Powered Hotel Management System

github.com/SameerAhmedAI/AI-Powered-Hotel-Management-System

Personal Project · Python · SQL · AI/ML

- Built an intelligent hotel management solution integrating AI-driven features to automate operations, optimize resource allocation, and enhance guest experience workflows.
- Combined a classical relational database backend with ML-driven insights to produce actionable recommendations within the system.
- Demonstrated ability to integrate AI components into a structured software product from scratch.

TECHNICAL SKILLS

AI / Machine Learning

TensorFlow, PyTorch, scikit-learn, OpenCV, NumPy, Pandas, Matplotlib

Programming Languages

Python, C++, C, Java, HTML5, AssemblyScript

Databases

MySQL, SQLite, Microsoft SQL Server

Tools & Platforms

GitHub, Anaconda, Streamlit, Arduino, Cisco, Windows Terminal

Hardware / Embedded

ESP32-WROOM (AI module integration)

Design

Adobe Photoshop, Canva

LEADERSHIP & ACTIVITIES

Team Lead — ZABEFEST AI Project Exhibition

2024 – 2025

SZABIST · Karachi, Pakistan

- Led a student team through the full project lifecycle for SZABIST's annual tech exhibition, with a mandate to build in the Computer Vision + NLP domain.
- Responsible for ideation, task delegation, technical direction, and coordinating the live demonstration to judges and industry visitors.
